

Asexual and Sexual Reproduction

Worksheet of Perfection!

www.CrosswordWeaver.com

ACROSS

- 2 A name for cells that are identical and produced by a parent.
- 5 The abbreviation that specifies the different phases of Mitosis.
- 7 combining of male and female reproductive cells.
- 9 A cycle made up of two stages. (1) to grow and develop and (2) to cell divide.
- 14 A type of bacteria that can cause food poisoning in humans.
- 16 A structure that produces a new organism by asexual reproduction.
- 17 Deoxyribonucleic acid.
- 18 A type of variation in the DNA sequences of each individual of a species.
- 19 A cell with a complete set of chromosomes.

DOWN

- 1 Asexual reproduction that involves the formation of an outgrowth that eventually grows and breaks off the parent.
- 3 Male or female reproductive sex cells.
- 4 When DNA gets condensed into structures and the cell is ready to reproduce.
- 6 A form of fission when a parent produces two identical cells.
- 8 A form of asexual propagation of a plant from a part of its roots, stems or leaves.
- 10 Another name for the young produced by parent(s).
- 11 A cell with half the number of chromosomes as the parent cell.
- 12 Type of reproduction where two parents contribute to form offspring that are not identical to each parent.
- 13 An exact copy of a cell or organism.
- 15 Type of reproduction where the offspring come from a single parent.
