## Bill Nye The Science Guy - Cells

Name	: Block_	Date	<u> </u>
1.	Rabbits have	Cells.	
2.	We have about	Cells in our body.	
3.	New are born a	and the old cells die off.	
	Cells have a	surrounded by	_·
	With mitochondria and		
5.	Plant cells have cell walls,	, animal cells have cell	that form.
6.	You might find a	which power the cell.	
7.	You will find bone cells,	cells, brain cells and	cells.
8.	Bacterial cells cabbage in	to and	into pickles
9.	is your body's fastest growing organ.		
10	tells your cell	ls what to do,genes are made of DN	A.
11.	DNA molecules are packet	ed in your cells in something calle	ed Humans
	have 23 pairs of chromoso	omes, with 23 from your ar	nd 23 from your making a
	total of		
12.	.Red blood cells are red b	pecause they have a protein in the	m called which
	has iron in it.		
13.	.White blood cells are the	things that attack ar	nd to keep us from
	getting sick.		
14.	.When chemicals exchange called	e chemical with other cells right the	ought the cell its
15.	List at least 5 different type	es of cells in your body.	
	i) ii)	iii) iv) v)	
16	The only cells that we ne born with them.	ever replaced in your body are	cells. You are already
